

Live Training

nJAMS Admin

The Integration Matters training approach means that we tailor learning to suit the specific needs of your business and organization. Our live trainings and workshops provide an efficient way to deliver in-depth knowledge to specific roles within your IT team.

nJAMS Admin – Administration Essentials

nJAMS Administration Essentials offers fundamental design, installation and configuration training for nJAMS administrators to build competence and confidence working with nJAMS through live and hands-on training. The training is designed for system administrators responsible for the setup, configuration and maintenance of your organization's process visibility suite.

The training provides a detailed explanation of how an nJAMS solution is designed, setup and managed by administrators. Through hands-on training, attendees will learn to install and configure your nJAMS solution including Elasticsearch, Wildfly, nJAMS Server and nJAMS Clients. Administrators will more easily be able to manage your nJAMS solution as well as support existing and future nJAMS users in your organization.

Topics Covered

- nJAMS overall setup and concepts
- How nJAMS interacts with the underlying technologies
- How to prepare for the installation
- How to install and configure nJAMS Client(s)
- How to install nJAMS Server
- How to configure and finetune the nJAMS Server
- How to administer nJAMS Server
- How to use advanced configuration of nJAMS Client(s)
- How to use nJAMS UI to monitor and troubleshoot issues
