

# nJAMS Client for BW

nJAMS is **not Just Another Monitoring Solution**. It is a unique process visibility suite which spans multiple integration platforms, enterprise applications and cloud services.

The nJAMS Client™ for BW enables TIBCO BusinessWorks™ engines to connect with nJAMS Server4™ for business process monitoring. The solution consists of two parts:

- nJAMS Server4™ running in a web application container and
- nJAMS Client™ for BW (a TIBCO BusinessWorks™ plugin) running within the same JVM hosting TIBCO BusinessWorks™.

The screenshot displays the nJAMS Process Insights web application. The interface includes a search bar at the top, a navigation menu on the left, and a main content area. The main content area is divided into three sections: a list of process instances on the left, a process diagram in the center, and a details pane on the right. The process diagram shows a flow from 'JMS Queue Receiver' through 'Login', 'Transformation', and 'Verify the correctness of customer against rating' to 'LogSuccess'. The details pane shows attributes for a specific process instance, including OrderID, price\_amount, SourceID, Product, and Type.

nJAMS provides process insights out-of-the box, supports implementation and test of new products and simplifies the issue resolution process through automated alerts and complete context information.

The nJAMS Client™ for BW can be used in explicit mode using the TIBCO Designer™ Palette or in implicit mode using the client without changing the TIBCO repositories depending on the needs and project requirements.

## Features:

- Monitors TIBCO ActiveMatrix BusinessWorks™ 5
- Visualizes BW process diagram and execution path
- Sends monitoring events and business context information to nJAMS Server4™
- Starts escalation procedures to resolve problems
- Automatic correlation of processes

## Company Profile

Integration Matters ([www.IntegrationMatters.com](http://www.IntegrationMatters.com)) helps enterprises to deliver on brand promises by providing tools and expertise necessary to monitor end-to-end business processes in high-volume and high-availability environments. By partnering with several renowned integration providers (e.g. TIBCO, MuleSoft, SAP) Integration Matters is able to offer its clients the optimal solutions for their specific requirements. Testifying to the success of its products and services, are over 300 clients from the energy, telecom, banking, insurance, retail and transport and logistics industries, spread across the globe.
