

nJAMS Plugin for Replay

nJAMS is **not Just Another Monitoring Solution**. It is a unique process visibility suite which spans multiple integration platforms, enterprise applications and cloud services. It provides process insights out-of-the box, supports implementation and test of new products and simplifies the issue resolution process through automated alerts and complete context information.

nJAMS Plugin for Replay helps operators of TIBCO or MuleSoft integration platforms resolving issues faster and correcting data easily. It also supports functional, performance and unit testing of integration processes or chains of APIs.

nJAMS Plugin for Replay records input data of a start activity of any starter process execution and allows users to replay that data whenever needed, taking access rights and processing privileges into account. Users have the possibility to edit and correct data before reprocessing.

The nJAMS Plugin for Replay server component has to be deployed on nJAMS Server. The client component has to be referenced by nJAMS Client for BW, nJAMS Client for BW6 or nJAMS Client for Mule. There is also a subscription for nJAMS Cloud available.

Features:

- GUI Extension for nJAMS Server, nJAMS Cloud and nJAMS Client
- Command line tool for automation and mass handling of replays
- History of each record replayed including its payload and timestamp for full visibility and auditability
- Controlled access to replay features based on the nJAMS privilege and role management features

Company Profile

Integration Matters (www.IntegrationMatters.com) helps enterprises to deliver on brand promises by providing tools and expertise necessary to monitor end-to-end business processes in high-volume and high-availability environments. By partnering with several renowned integration providers (e.g. TIBCO, MuleSoft, SAP) Integration Matters is able to offer its clients the optimal solutions for their specific requirements. Testifying to the success of its products and services, are over 350 clients from the energy, telecom, banking, insurance, retail and transport and logistics industries, spread across the globe.
